REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment file on 11/8/04.
2. Claims 1-5, 8-13, 15-35 and 38 are allowed.
3. The following is an examiner's statement of reasons for allowance:

References (6418175), (6445342), (6504506), (6647078), (6362781) and (6647078) are additionally cited because they are pertinent to the claimed invention.

-Regarding to independent claim 1, none of prior art of record teaches or suggests the method as claimed. Thomas et al (6141393), previously cited, teaches the method except he fails to teach the limitation "the first signal comprises at least two different instances of a predetermined sequence, further comprising the step determining variations in channel response between the different instances of the predetermined sequence", in combinations with other limitations recited in the claim. It would not have been obvious for one skilled in the art to implement Thomas et al, in view of other prior art of record in order to make such an implementation leading to the claimed method.

-Regarding to independent claim 23, none of prior art of record teaches or suggests an apparatus wherein the apparatus comprises a mean square error estimate determiner, operably coupled to a branch weight determiner, that determines a mean square error for a combined signal; and a channel state information restorer, operably coupled to a signal combiner and the mean square error estimate determiner, that applies a function of the mean square error estimate to the combined signal to restore a soft decision component of the combined signal; in combinations with other limitations recited in the claim.
